

## SPS fibre FORM Modular Cabinet Mounting Option..... UNISTRUT

SPS fibre FORM's vacuum formed panels are designed to accommodate UNISTRUT mounting systems. The use of sealed stainless steel rivets into the inner wall, and silicone behind each strut length give a solid mounting surface where ever needed. Vertical strut at each panel flange area is the standard mounting system offered, however, optional patterns are available.

Unistrut width is standard 1-5/8" with 13/16, 1" & 1-5/8" depth's available. Length available up to 20'-0", standard length is as per panel, less 2" clearance.
